Escorts Sheriff On Trip--Hurts Hand

Mat Callahan went a visiting Wednesday of this week. Fact went along with Sheriff Clementsen over on Green river to see that the sheriff returned safely from his mission. While in that neighborhood, Mat was invited out at one of the ranches to see the poultry on the farm and in his hurry to accompany his guide about the place, neglected to replace his overhaos on his number sixes. It so happened that there was a slippery place enroute and the number sixes flew out from under Matt who sat down on the beautiful snow--for what else could he sit on. In doing this (dis) graceful stunt, his hand was thrown out in an effort to save himself from the jar of the fall in the lap of the beautiful snow, caught on a snag and was badly snagged on a burned, willow stump. The hand has been encased in white gauze with strong odor of medicine. As a result the gentleman has a strong excuse to lie abed of mornings and in time to eat with the last cabin. Can't even play a game of slough. It is that the injured member will heal in time.

Live Stock Losses

May Be Serious

Rawlins, Wyo, Dec. 30--Word comes from Elk Mountain to the effect that the recent storms in that vicinity are working extreme hardships on the stockmen, and more particularly at the Fisher where the snow has drifted to such an extent that the haystacks are all covered and they are unable to get feed to the cattle, which are suffering frightfully and some of them are growing very weak. Unless relief is obtained within a short time the loss will be heavy in that section.

The storm near Wamsutter, where most of the sheep are wintered, was also a bad one and the sheepmen are now making arrangements to begin feeding at an early date. Hay and grain is being stored at Wamsutter and Bitter Creek for heavy feeding should it become necessary.

Cowboy Rangers To Meet

A meeting of the National Order of Cowboy Rangers, comprising the newly organized camp at Pinedale has been set for Saturday evening, January 13, opening at 8 p. m. A full complement of officers-elect and candidates who have not as yet been initiated are requested to be present at the time set, in order that the camp may be started off properly. Organizer Dr. Hook expects to be present from Pinedale for the occasion. Any others desiring to be initiated should hand in their applications for action at this meeting. All officers should be present at this meeting. So see that

Bridges Across Pine Creek Completed

O W Finney of Omaha, engineer in charge for the Monarch Engineering Co., of Falls City, Nebraska, who have the bridge contracts in Fremont county, and who have been building the bridge across Pine creek south of town, completed the work of the two bridges yesterday about ten o'clock, having done a splendid piece of work and in the short space of time of nine and a half days actual working time of ten hour shifts. One of the bridges measures 80 feet in length and the second bridge 70 feet long. A total of 20 tons of steel went into the bridges and 2,000 feet of native lumber, at an approximate cost of \$5,000.

Mr Finney has been delayed much of the time since his arrival here on account of lack of material, which had to be freighted in from the road. Let it be said to the credit of the local industries, that every stick of local material was on the ground when the engineer arrived, and that the Town of Pinedale had completed their portion of the work of building the road bed approaching the first bridge on the east stream. Only unskilled labor was available, but with this Mr. Finney did his work of building 160 feet of bridge from the living of the first pile to placing of the last nail, in 80 1/2 hours. The young man is entitled to the credit of rapid work, and report has it a splendid set of bridges. The gentleman left this morning for Omaha, his home, where he will visit his family a few days, leaving there for a job in Oklahoma.

Ohio Man Will

Wyoming Bride

The Rock Springs friends of the bride have received the announcements of the marriage of Miss Janet Virginia Hawk and Mr. Geo. Kee Hoffman, Jr., which occurred in Ogden, Utah, on Saturday, December 23rd.

The bride is the only daughter of Dr. and Mrs. J. W. Hawk, of Green River, and is a handsome and accomplished young woman.

While attending Wesleyan University at Delaware, Ohio, she became acquainted with Mr. Hoffman, who is a prominent young business man of Delaware. They will be at home at Delaware, Ohio, after February first.

The Sweetwater county friends of the bride extend congratulations and good wishes, but regret that her marriage is to take her so far from Wyoming.--Rock Springs Miner.

you are present.

COMMITTEE.

Geo. Sandlin, brother of Dug, our efficient road supervisor was a Pinedale business visitor yesterday.

LOCAL AND PERSONAL

Mrs Zeph Jones returned Monday evening from the road on the auto, after an absence of six weeks in Utah.

LOST--Her voice Finder please return to Mrs. E. M. Gump. Been missing for several weeks. Wm. Woods was a Pinedale visitor Monday.

Wm. Luce, stockman from south western Fremont county, was a Pinedale caller Sunday on business matters. Mr Luce reports stock conditions generally good in his section.

Albert Bayer returned to Pinedale Tuesday by sled and team, having visited at Lander for a few days since leaving here. Mr Bayer reports plenty of fine sledding between here and the county seat.

Ranger McKee returned Monday evening from the road, having spent the Christmas and New Year periods with his parents at the family home at Gunnison, Colo.

Weather perfectly lovely. If any nicer, don't know what we Pinedalites would do. Just simply couldn't hold ourselves in with any more perfect day and night.

Guy Holt and family have moved from their ranch at Cora to t. Crosthwaits place of W. J. Shalley, where they are located for the balance of the winter, which they feed his cattle. The children are attending the Pinedale school.

Sheriff Clementsen made a trip to Big Sandy Monday, on business in connection with his office.

The sick of last week are well on the road to recovery and with careful nursing should pull through until spring unless a relapse occurs.

Mrs May Martin, nee May Baye who has been visiting relatives a Pinedale for the past month, in company with Miss Tremmel, left Saturday morning for the road.

Earl Workman of the Cora section was down on Thursday of last week and made proof on his home stead entry before U. S. Commissioner Patterson Messrs. George Tyler and Irvin Lozier accompanied him as witnesses in the case.

Tom Gray and Morgan Hanks of Kendall motored down Monday from that section behind a team and sled. Tom left the following morning on the auto for the road on his way to Ohio, to spend the balance of the winter. Mr. Hanks returned to Cora that afternoon to be on hand to take the mail out Tuesday morning, having the contract from Cora to Kendall and while here prepared a bid on the new mail letting on the route extending from Kendall to Pinedale. Team and sled are being used on the route at present.

F. A. Kaul, government trapper in the Biological service, is meeting with considerable success in the capture of coyotes this winter. Having taken nearly twenty in traps since along in November. The animals are brot in alive but safely secured from injury to the custodiam of the animal by placing a wire around the mouth, then tied on the back of the saddle. The animal is then scientifically and humanely despatched by inserting a wire until it touches the heart; the animal skinned and the pelt preserved and turned over to the government who dispose of them in large quantities, at present, at fancy prices.

A new lot of la grippe patients have been put on the job the past week. Those complaining last week are on the road to wellville. The editor has been no exception to the rule. In fact not sick enough to be down and out--sorta mooping around.

If the business interests of Pinedale will put their shoulder to the wheel this winter and line up for the developments of the town and

Surprised By Friends

Miss Elsie Bayer was pleasantly surprised Saturday evening unexpectedly by the arrival, one at a time of a number of friends, who, when they had all gathered, informed the young lady that it was her twenty-first birthday they had come to help celebrate. Miss Bayer was taken completely by surprise. A word game was indulged in by those gathered, taking the words "January Sixth" the date of the young ladies' birth from which words and sentence were formed and the one making the greatest number of sentences receiving a prize, as did also the one forming the least number of sentences. Miss Kaul captured first honors, and to Wm Bayer fell the booby prize, a package of marbles. Following the award, a nice lunch was served by Mrs. Broom, sister of Miss Bayer, and as much enjoyed. The affair was held in the dining room of the Pinedale hotel.

A. LUMAN,
J. P. BOYLER,
Directors.

account of the oil-bearing formations in central Wyoming, and points out the formations most likely to contain petroleum, such as the Frontier, with its important Wall Creek and Peay sandstone members, which are the productive sands in the most noted commercial oil fields of Wyoming. The report describes more than 20 anticlinal folds and notes whether the prospects that they may contain petroleum are favorable or unfavorable.

Large sums have been spent in prospecting in this region, but much of it has been wasted in unlikely places, and it is believed that wells properly located would perhaps yield oil in commercial quantities. The places where most promising oil sands are concealed in anticlinal folds are pointed out in the final discussion.

A copy of bulletin 841-I, entitled "Anticlines in Central Wyoming," by C. J. Hare, will be sent free of charge on application to the Director of the U. S. Geological Survey, Washington, D. C.

Ten Arizona Mines

Pay \$34,000,000 Dividends

Ten mines in Arizona paid \$34,000,000 in dividends during the past year. Adding Utah, Montana, Nevada and Idaho dividends to those of Arizona we have a total of over \$100,000,000 in dividends paid out of the mines of these five western states in a single year.

These are some of the impressive facts brot out by the report of the Geological Survey to Secretary Lane just made. "Never before," said Mr. Lane, "has so large a draft been made on the natural resources of our country as during this year, and never before have the metals been extracted from these ores with less waste or utilized to better advantage in advancing the general prosperity of the country. Even as written in the plain figures of 1916 production the wonderful record of our mines set forth a degree of national industrial independence only hoped for a few years ago.

"Again copper stands out as the best illustration of how American mines can meet a world demand. The output of nearly two billion pounds of the red metal is double that of ten years ago and its value is twice that of the copper produced in 1915. Add to this the facts that in value copper now con-

tends with iron for first place among the metals and that together the amount of these two metals produced last year had a value of more than one billion dollars and we have a measure of what this country can contribute in useful metals.

"The output of zinc from domestic ores increased last year 45,000 tons, which makes a new record for that metal, the total value of spelter from United States also shows a large increase, the ore being 150 million dollars. Lead 75 million dollar output being a gain of more than 50 per cent.

"With all this activity in metal production, the coal mines have had to meet a heavy demand, so that the bituminous coal output has now passed the half-billion ton mark, an increase of 12 1/2 per cent over the previous year. Coke production increased 30 per cent and it is interesting to note that by-product coke made the largest gain, which means a corresponding gain in benzol and other valuable by-products.

"Again the oil wells have given a new record for petroleum yield, the estimate of marketed production of crude petroleum for 1916 being 492 million barrels or 11 million barrels more than in 1915.

"Another mineral product which furnishes an index of business condition is cement, the 1916 production of which is estimated to be five million barrels in excess of the output of the previous year, while the shipments were even greater, aggregating 94,500,000 barrels, with the outlook reported as good for the new year.

"The reports received from the survey's western offices contain most significant mining records. Every western state shows a large increase in yield of metals, Arizona leading with a gain of 100 million dollars over last year while Utah and Montana together report another 100 million dollars gain. Alaska also had its best year contributing a total value of more than \$50,000,000 this year, or over 50 per cent in excess of any previous year.

"These advance statements not only show that 1916 marks a new advance for the mineral industry of the country, but this remarkable increase promises to be up approximately 25 per cent over the 1915 production, so that we may expect the final figures to show a total of three billion dollars."

PREPAREDNESS

In financial matters when opportunity presents itself, or adversity knocks at your door, may be the Gibraltar of the business you are engaged upon or your home.

Preparedness in time of need gives one a feeling of independence as well as confidence.

Your earning days are not everlasting, but the earning power of financial preparedness is the substitute for any emergency.
